Summary

Java Backend Engineer specializing in cloud-native microservices and distributed systems. Experienced in modernizing enterprise applications using Spring Boot and Google Cloud Platform. Certified Google Cloud Associate Engineer with hands-on experience delivering production systems in Agile environments.

Work Experience

EPAM Systems

Wrocław, Poland

SOFTWARE ENGINEER

Jan. 2025 - PRESENT

- Member of a migration team modernizing legacy enterprise systems into cloud-based microservices architecture on Google Cloud Platform.
- Develop and maintain backend API services across multiple repositories supporting distributed cloud applications.
- Authored and introduced a Kotlin coding conventions document adopted across projects to standardize development practices and improve code consistency.
- Mentor engineers across the organization as part of a dedicated mentoring program, reviewing completed tasks, conducting demo sessions, and supporting technical skill development.
- Contribute to development and evolution of cloud-native backend services using Google Cloud Platform.

Grid Dynamics

Wrocław, Poland

JUNIOR SOFTWARE ENGINEER

Feb. 2024 - Dec. 2024

- Contributed to long-term maintenance and feature development of a production API, focusing on stability improvements and system enhancements.
- Participated in a cross-functional initiative delivering new functionality within a distributed system architecture.
- Collaborated with a globally distributed team across multiple time zones in a remote-first environment.
- Completed a multi-month internal educational program focused on backend development and enterprise software engineering practices.

Capgemini

Wrocław, Poland

SOFTWARE ENGINEER INTERN

May. 2022 - April. 2023

- Completed a structured backend development training path including technical courses and practical engineering assessments.
- Contributed to development and enhancement of a productivity-focused application, implementing new features and resolving defects.
- Prepared technical documentation supporting knowledge transfer and project maintainability.
